UVID DRONETECH 2021 // NOVEMBER 10, 2021

The UVID Dronetech Conference is an initiative of IsraelDefense and Op-TeamUM. It aims to bring together, under the same roof, all relevant stakeholders in this sector as one holistic ecosystem, in order to discuss the most pressing issues of unmanned systems in the civil and defense sectors.

UVID Dronetech 2021 Theme is:

The Drone's Role as a National Engine of Growth

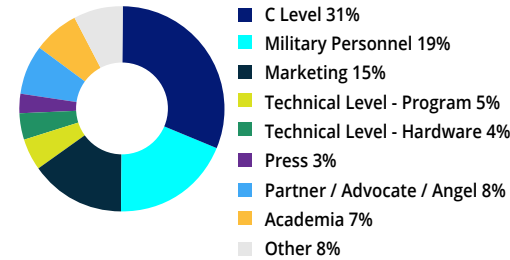

Topics:

- UAS as a strategic and national engine of growth
- The national approach and the required steps to use drones
- Smart unmanned solutions and innovation
- Unmanned urban air mobility, challenges, and opportunities
- Drone autonomy, AI, swarms, and big data transformation
- Changes in the Drone / UAS domain worldwide
- Multidisciplinary education and academia as a key factor for the national dominance of drone technology
- Counter-UAS – challenges and opportunities

UVID Dronetech serves as a premier meeting place for local and international companies operating in the field of unmanned systems, and offers excellent business and networking opportunities for all participants – including a B2B concept. The event will include lectures and panels led by prominent speakers from around the globe, alongside a comprehensive exhibition and live demo of unmanned systems. The conference will be held for the eighth consecutive year, following the success of the previous UVID conferences, during which thousands of visitors from 25 countries toured 70 exhibition pavilions and took part in dozens of conference sessions
