UVID Dronetech 2024

The UVID Dronetech Conference, organized by IsraelDefense and Op-TeamUM, aims to unite all relevant stakeholders in the unmanned systems sector under one roof. This event provides a platform to address the most pressing issues in both the civil and defense sectors, fostering a holistic ecosystem for comprehensive discussions and solutions.

The central theme for UVID Dronetech 2024 will be:

Drones at the Edge of a New Strategic Era

Topics:

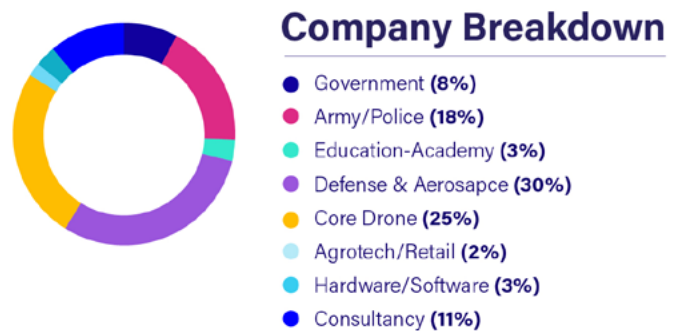

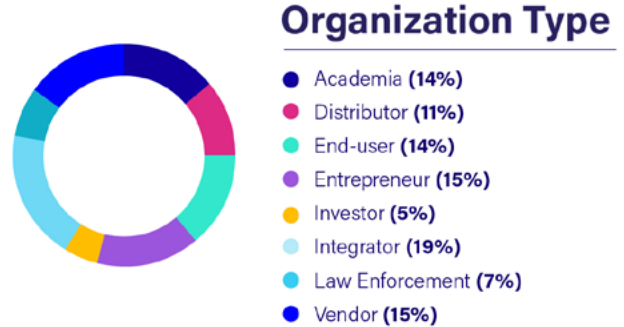

- National approach and required steps to use drones as a strategic and national growth engine
- UAS revolution in warfare
- Innovation and smart unmanned solutions: Drones as a Service
- Drone autonomy, AI, swarms, and big data transformation
- Counter-UAS systems and air defense: challenges and opportunities
- First responding missions and municipal/urban use of drones
- Unmanned Urban Air Mobility (UAM): challenges and opportunities
- International approaches and changes in the global drone realm
- Drone education and academy
- The threat of drones and strategies to counter them
- Next-generation loitering drones
- Cybersecurity for UAVs
- War as a catalyst and accelerator for technological advancements
- UAV systems' central role in both spatial and homeland security missions
- Women in the UAV industry

UVID Dronetech is a premier gathering for leading industry executives in the field of UAS/drones, government officials, policymakers, stakeholders, scholars, and military and law enforcement members from Israel and around the world. Now celebrating its 12th anniversary, this annual event features lectures and panels by prominent international speakers, a comprehensive exhibition, and live demonstrations of unmanned systems. UVID Dronetech provides excellent business and networking opportunities, including a B2B component.

Thousands of visitors from over 25 countries have attended previous UVID Dronetech conferences, participating in dozens of sessions and exploring 70 exhibition pavilions. Hundreds of companies have showcased their innovative solutions at UVID Dronetech.
