UVID DRONETECH 2025

Israel's largest and most prestigious event for the unmanned ecosystem

Unmanned Systems Revolution: A New Strategic Era

Conference Chairman: Mr. Alon Unger

November 27, 2025 // Expo Tel Aviv
Main Event: Conference and Exhibition

December 1, 2025 // Yeruham UVID Airshow

Civil Applications
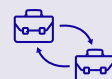

Defense & Security

Smart Data, AI & Autonomy

Delivery & Urban Air Mobility

First Responder & Municipal Use

B2B

Counter-UAS

Infrastructure & Energy & Agriculture

New Tech, Innovation & Investments

Drone Education

UVID Dronetech 2025

UVID Dronetech is Israel's premier UAV/drone conference and exhibition, serving as a central meeting point for all stakeholders in the unmanned systems industry.

The event highlights both the civil and defense/security aspects of drone technology, recognizing the importance of a dual-use drones ecosystem.

UVID Dronetech underscores the strategic importance of unmanned systems for national growth and security.

The central theme for UVID Dronetech 2025 will be:

The Unmanned Systems Revolution: A New Strategic Era

Topics:

- Strategic Vision: National strategies and necessary steps for utilizing drones as a driver of economic growth and national security.

- Defense and Security: The role of unmanned systems in modern warfare.

- Counter-UAS: The drone war's challenges and solutions.

- Technological Advancements: Innovations in drone autonomy, AI integration, swarm technology, and the use of big data.

- Investments and Entrepreneurship in drones.

- Smart Unmanned Solutions for Civilian Applications

- Unmanned Systems Future Trends & Innovation Around the Globe.

- Cybersecurity: Addressing the critical need to secure drone systems from cyber threats and vulnerabilities.

- Human Capital: The importance of drone education and training, along with promoting the role of women in the UAV industry.

- Drones Regulation.

- Dual-Use Technologies: Military and civilian applications for versatile, scalable solutions.

UVID Dronetech 2025, organized by IsraelDefense and Op-Team-UM, is a comprehensive event dedicated to exploring the latest advancements, challenges, and opportunities in the unmanned systems sector, with a particular focus on drones. The conference will bring together industry leaders, government officials, experts, researchers, and innovators to discuss the evolving landscape of drone technology and its impact on various sectors.

Who Should Attend:

- Civilian, defense and security agencies

- Government officials, authorities, and policymakers

- Drone manufacturers and technology providers

- Drones users, operators, pilots and technicians

- Researchers academics, and educators

- First responders and law enforcement officials

- Investors and venture capitalists

- Industry professionals from various sectors (agriculture, logistics, infrastructure, etc.)
